CAREER GOAL

I am passionate about creating high-performance web applications using modern technologies such as ReactJS, Node.js, and MongoDB.

Through real-world projects like Spotify Clone (Frontend) and Job Connection Web App (Full-stack), I have built a strong foundation in frontend development as well as backend API design, authentication, and database management.

My goal is to contribute to a forward-thinking company by delivering reliable software solutions and continuously improving user experiences.

EDUCATION

MindX School of Technology 2024 - 2025 Full-Stack Web Development Program

Saigon Tourist College 2018 - 2020

Hotel Management

TOEIC Certificate Score: 480 (2023)

TECHNICAL SKILLS

Programming Languages *JavaScript (ES6+), HTML5, CSS3, SQL*

Frameworks/Libraries Frontend: *ReactJS, TailwindCSS, Redux Toolkit, React Router,*

Backend: *Express.js, Mongoose, JWT, bcrypt, dotenv, CORS, Nodemon*

Database Management Systems

MongoDB, MySQL, MSSQL

Source Code Management Tools: *Git, GitHub, Postman, Vercel, VS Code*

PROJECTS

Personal Project : *Spotify Clone* 10/2024

Description	Developed a full-featured music streaming web application inspired by Spotify, allowing
Function	● Implemented Login/Signup authentication using mock API and LocalStorage. ● Created Home, Search, Library, Playlist Detail pages with responsive design. ● Added music player functions such as play/pause, next/previous, progress bar, and favorite songs. ● Integrated language selection and theme customization. ● Applied shimmer loading effect and hover animations to enhance user experience.
Position	Front-End Developer
Technology used	● Frontend: ReactJS, TailwindCSS, React Router, Vite ● Tools: GitHub, Vercel
