

Huynh Vi Khang - AI Engineer Fresher

 netrptony |  huynhvikhang6a13@gmail.com |  +84.767.4.878.40

SUMMARY

I am a final-year Information Technology student with 1+ year of experience in software development and AI-related projects. My career goal is to become a dedicated AI Engineer who contributes to building innovative and data-driven solutions. I am eager to join a professional team where I can apply my analytical thinking, problem-solving skills, and strong technical foundation in AI to create real-world impact and grow alongside the organization.

WORK EXPERIENCE

Data Pipeline Developer, VIETSUNCO (Vietnam)

Aug 2024 – Jan 2025

Trade and Commerce Management Application

- Developed data pipelines for a cross-platform app connecting real estate, charities, startups, and investors.
- Built automated web crawlers using **Python**, **Scrapy**, and **Pandas**, collecting 10K+ records for analysis and integration with **MongoDB**.
- Collaborated with the AI team using **PyTorch**, **TensorFlow**, and **Hugging Face** to power recommendation and NLP features.
- Reduced data preprocessing time by 80% and improved matchmaking efficiency by 25%.
- Supported Industry 4.0 digital transformation by delivering scalable and intelligent data infrastructure.

AI Engineer Intern – Tam Anh Software Solutions Co., Ltd

Mar 2025 – Jun 2025

- Contributed to the development of a web-based employee attendance system using face recognition.
- Assisted in system testing, debugging, and improving performance for real-world deployment.
- Collaborated in an Agile R&D team, reporting daily tasks and supporting integration with backend services.

Boarding House Management System (Freelance Project) [Github](#)

Aug 2025 - Sep-2025

- Worked as a **Full-stack Developer** in a team of 4 to build a boarding house management system, including modules for room allocation, contracts, tenant management, and payment tracking.
- Developed the **backend** using **FastAPI** and **MySQL**, implementing authentication and role-based access control with **JWT**.
- Designed the **frontend** using **ReactJS** and **Bootstrap**, providing a responsive and user-friendly interface for administrators and tenants.
- Strengthened skills in API design, database modeling, and secure client-server communication through practical implementation.

Pokémon Card Recognition System (Freelance Project) [Github](#)

Sep 2025 - Present

- Developed an AI-powered system to recognize Pokémon trading cards using computer vision and OCR technologies.
- Built detection and recognition pipelines combining **YOLOv10** for object detection and **PaddleOCR/VLM** for card text extraction.

- Designed and implemented a web crawler to collect and update card price data from multiple sources automatically.
- Processed and prelabeled large-scale image datasets, applied data augmentation, and conducted model training for high-accuracy detection.
- Built automation scripts for data collection, annotation, and evaluation, optimizing training workflows, and improving model precision.

EDUCATION

2021 – 2025 **Bachelor’s and Engineer Program in Information Technology,**
Ho Chi Minh City University of Industry and Trade
Completed coursework; pending graduation review (expected: Jan 2026) (GPA: 3.0/4.0)

PUBLICATIONS

Huynh, Vi Khang et al. (May 2025). “Student Attendance System Using Face Recognition at the Dormitory of Ho Chi Minh City University of Industry and Trade”. In: *Journal of Science, Ho Chi Minh City University of Industry and Trade*. Available online: bit.ly/FaceRecog2025, pp. 1–9.

SKILLS

Technical Skills	Python, C#, SQL, HTML/CSS/JavaScript, ReactJS, OpenCV, Machine Learning (basic), API integration
Tools & Platforms	Git/GitLab, Postman, , Google Cloud, Cloudinary, Label Studio
Soft Skills	Team collaboration, Task coordination, Online communication, Problem-solving, Time management, Fast learning

CERTIFICATIONS

Encouragement Award Digital Transformation Challenge 2024–2025
Project: Dormitory Management System for Ho Chi Minh City University of Industry and Trade
[View Certificate](#)
